LIXIL Launches “Toilets for All” Initiative in Japan to Tackle Sanitation Challenge

Under Buy One/Give One scheme, a SATO will be donated to developing countries for each LIXIL shower toilet sold in Japan

Tokyo, Japan – LIXIL Corporation (“LIXIL”), a global leader in housing and building materials, products and services, announced that it will launch a new “Toilets for All—Buy One/Give One” initiative to help improve sanitation conditions in developing countries in Asia and Africa as well as raise awareness of global sanitation issues in Japan. This is the first time for LIXIL to implement this kind of cause-related marketing campaign, which will initially run for six months from April. Through this initiative, for every LIXIL shower toilet sold in Japan, LIXIL will donate one of its innovative SATO toilets to underserved communities in developing countries.

LIXIL President & CEO, Kinya Seto, commented, “One in three people globally still lacks access to proper sanitation, which is a figure that is hard to comprehend for many in Japan. At LIXIL, we believe that everyone in the world should have access to clean and safe sanitation, and that action is required to help make this happen. Through this program, we will work with international organizations to provide improved sanitation to people in need, while at the same time helping to raise awareness of the issue in Japan.”

LIXIL has made ‘Global Sanitation & Hygiene’ one of the key pillars of its corporate responsibility strategy, pledging to provide better sanitation to 100 million people by 2020. Developing and scaling-up distribution of the SATO range, which helps reduce the transmission of disease and odors from traditional open pit latrines, is a central part of LIXIL’s strategy to reach the 100 million target. More than one million units of SATO have been distributed and installed across more than 14 countries worldwide, helping to improve sanitation conditions for more than 5 million people.

Through the new Toilets for All initiative, LIXIL is collaborating with the Japan Association for UNHCR as a principal partner of UNHCR, the UN refugee agency, as well as non-governmental organizations including WaterAid, BRAC, and Habitat for Humanity to facilitate the distribution and installation of donated SATO in underserved communities. LIXIL also closely works with these agencies to actively communicate the practical and social benefits of SATO to recipients, ensuring the toilets are not only
installed but used. Product donations through this initiative, supported by consumers in Japan, enable LIXIL to demonstrate the value of SATO and the importance of proper sanitation, and to further expand distribution to those in need.

At the same time, LIXIL has been expanding SATO as a business unit, strengthening its manufacturing capabilities and coverage. In addition to manufacturing partnerships and established distribution channels in Bangladesh and Uganda, LIXIL is developing new license agreements with local partner companies to expand production and distribution in countries including India and Kenya.
